

DELHI PUBLIC SCHOOL, PATAUDI

Circular No: DPS/P/2019-20/127

Date: 06.03.20

Dear Parents,

Greetings!

COVID-19 is a new infection, but there is no need to panic. We are taking all possible steps to keep our school safe.

Teachers are constantly talking to the children about the precautions that need to be taken for the same.

Please ensure you do not send your child to school even in case of a mild cough, sneezing or cold. We are ensuring that staff would make children periodically wash their hands after every half an hour. Please ensure you do the same for yourself and children at home.

We are doing regular handwashing in class for the children, teachers and didis along with our usual hand-sanitising sessions. Our washrooms are also cleaned and sanitised at frequent intervals.

Do's

- * Regular hand washing for atleast 20 seconds
- * Covering mouth and nose while coughing and sneezing
- * Wear a face masks to eliminate any exposure to the virus and people who are infected with the virus
- * Avoid contact with animals, birds and meat products
- * Using a room humidifier or a hot shower can help with a sore throat or cough
- * Drink plenty of fluids
- * Take adequate rest and sleep
- * If symptoms feel worse than a standard cold, consult your doctor

Don'ts

- * Avoid close contact with anyone showing symptom of respiratory illness such as coughing and sneezing
- * Travellers should avoid coming in close contact with sick passengers, especially people with cold symptoms
- * DON'T FALL PREY TO RUMOURS!

Best Wishes

THERE'S ONLY ONE THING
YOU NEED TO UNDERSTAND
ABOUT HOW A CORONAVIRUS

SPREADS

THE VIRUS SPREADS WHEN
these droplets

SO IF YOU SEE SOMEONE WHO IS
VISIBLY COUGHING/SNEEZING/SICK,
YOU CAN CHOOSE TO:

- ① KEEP YOUR DISTANCE.
2m to 0.5m will keep you safe
from large droplets.

OR,

- ② GIVE THEM A MASK.
THEY CAN COUGH / SNEEZE INTO IT
AND PROTECT EVERYONE ELSE NEARBY

AND IN GENERAL, IT'S A GOOD
IDEA TO AVOID CROWDS, BECAUSE
YOU DON'T KNOW WHO MIGHT BE
SICK.

People who are
infected can show
no symptoms,
but are still
INFECTIOUS?

← Maybe she's not sick,
just protecting herself.

HOWEVER, SOMETIMES A SICK PERSON'S SALIVA CAN GET ON OTHER THINGS...

→ & EVEN ON THE
OUTSIDE OF
→ YOUR FACE MASK

AND IF YOU TOUCH ANY OF
THESE THINGS BY ACCIDENT,
AND THEN TOUCH YOUR FACE,

≡ RUB EYES ≡

OR YOUR
LOVED ONES
FACE

YOU MIGHT ALL FALL SICK.

VIRUSES CAN LAST FOR UP TO 48 HOURS ON OBJECTS,

AND THE ONLY EFFECTIVE WAY TO GET RID OF THEM IS TO WASH THEM OFF WITH SOAP.

WHICH IS WHY IT IS ALSO
GOOD TO FOLLOW THESE

PRECAUTIONS

1

WASH YOUR HANDS THOROUGHLY WITH SOAP AND WATER FOR AT LEAST 20 SECONDS AFTER TOUCHING A SUSPECTED CONTAMINATED SURFACE

WHAT IS THOROUGHLY?

WASH THE
BACK OF YOUR
HANDS

BETWEEN
THE FINGERS

UNDER
THE NAILS

ENOUGH TIME TO
SING "HAPPY BIRTHDAY"
TWICE

2

COVER YOUR COUGH WITH A DISPOSABLE TISSUE OR USE MASK AND DISCARD THEM IMMEDIATELY IN A WASTE BIN. DON'T WEAR THE MASK FOR MORE THAN A DAY.

* BACTERIA GROWS ON THE INSIDES OF YOUR MASK IF YOU WEAR THEM TOO LONG

ALSO, DON'T TOUCH THE OUTSIDE OF THE MASK IF YOU CAN.

IF YOU DID, DON'T WORRY, JUST WASH YOUR HANDS WITH SOAP AFTER

3

AVOID COMING INTO CONTACT WITH PEOPLE WHO ARE SICK OR SHARE THE PERSONAL ITEMS, FOOD, UTENSILS, CUPS & TOWLES

EVERYONE GETS THEIR OWN TOWEL

4

AVOID TOUCHING YOUR EYE, EARS AND NOSE

AND FINALLY,

5

SEEK MEDICAL ADVICE IF
YOU ARE SICK

STAY SAFE,
EVERYONE!
